Attachment: Impact on children's development ...

Environmental factors. Bowlby's attachment theory is a truly environmental theory as it has explained individual differences in attachment patterns (attachment types) by individual variations in caregivers' behaviour. In their seminal study [], Ainsworth and colleagues found links between observed caregiving behaviour at home and characteristic behaviour patterns in the laboratory-based SSP.

Environmental and genetic influences on early attachment ...

Opportunity for attachment: Children who do not have a primary care figure, such as those raised in orphanages, may fail to develop the sense of trust needed to form an attachment.; Quality caregiving: When caregivers respond quickly and consistently, children learn that they can depend on the people who are responsible for their care, which is the essential foundation for attachment.
