Enderton also introduces different options of the setup. For example, in real number construction, he explains there are 3 ways, by decimal extension, by Cauch series, or, as he adopted, by Dedekind's cut. For those would like to try a bit more deep topics, the last two chapters are a good start.

92 5. Construction of the Real Numbers By use of the cancellation law (Corollary 4P), we obtain  $m + s = r + n$ , and thus  $\langle m, n \rangle \sim \langle r, s \rangle$ .-I Definition The set  $7L$  of integers is the set  $\langle w \times w \rangle \sim$  of all equivalence classes of differences. For example, the integer  $2z$  is the equivalence class
