2. Optics-inspired Geometric Priors of PSF In this section, we analyze the principle of optics to derive the geometric priors of the aberration PSFs. Fig. 1(a) shows the light paths that cause the spherical, coma and chromatic aberrations. Generally, lens-based imaging systems are axisymmetric with respect to the optical axis, thus

Optics is the branch of physics that studies the behaviour and properties of light, including its interactions with matter and the construction of instruments that use or detect it. Optics usually describes the behaviour of visible, ultraviolet, and infrared light. Because light is an electromagnetic wave, other forms of electromagnetic radiation such as X-rays, microwaves, and radio waves ...
