Each time you start GMAP or GSNAP, the program tests to see if the computer can run the same set of SSE2 or SSE4.1 instructions as were available when the programs were compiled. (The programs also check for if the popcnt instructions work, but popcnt is so widely implemented that they generally do not cause any problems.)

How to Get auto tune (t-pain effect) in Audacity using gsnap
GChorus Manual Welcome to GChorus. GChorus is a traditional chorus effect. It takes an incoming audio stream, splits it in two, detunes one stream by a user-defined amount, which also oscillates between being in and out of tune, and then blends the two back together again.

GVST - GChorus Manual
For an intense, hardcore sound to your vocals use the piano interface on the left of the GSnap dialog box to manually select a new note. As the song plays, the current note appears as a waveform in the box on the left. Pause the song at the note you want to adjust and select a note from the keyboard.

How to Use GSnap Autotune Hardcore Vocals | Our Pastimes
GSnap is an auto-tune effect. It can be used subtly to correct the pitch of a vocal, or, with more extreme settings, to create a robot-voice effect. It requires a monophonic input signal to operate. Try GSnap with non-vocal material for interesting effects.
