All rights reserved. Cases of suspected abusive head injury are invariably a challenge for all involved professionals. A multidisciplinary approach affords the opportunity to share complementary perspectives, roles and mandates that lead to a comprehensive case plan. While the investigation of suspected abusive head injury will frequently be initiated by the treating physician (usually the paediatrician), the quality and quantity of evidence gathered by social services and police are crucial ...

Suspected abusive head trauma: Guidelines for a ...

Intended for use by those planning and delivering care to adult and paediatric patients with traumatic brain injuries, a holistic and multidisciplinary approach is emphasised. Topics covered include emergency, acute and longer-term care of the patient. Rehabilitation, medico-legal issues and the

role of physiotherapy are also discussed in detail.

Intracranial pressure monitoring in head injury (Chapter ...

Penetrating head injuries (PHIs) can have diverse presentations and mechanisms; therefore, treatment methods have not been clearly outlined. Vascular injury is common and foreign body removal is often required. We present three cases to illustrate low-velocity nonmissile penetrating head injuries (NPHIs) and discuss a multidisciplinary approach.
