### How Cancer Crossed the Color Line | Department of History

How Cancer Crossed the Color Line. Keith Wailoo. Description. In the course of the 20th century, cancer went from being perceived as a white woman's nemesis to a "democratic disease" to a fearsome threat in communities of color. Drawing on film and fiction, on medical and epidemiological evidence, and on patients' accounts, Keith Wailoo tracks this transformation in cancer awareness, revealing how not only awareness, but cancer prevention, treatment, and survival have all been refracted ...

People of all colors, including those with brown and black skin, get skin cancer. Even if you never sunburn, you can get skin cancer. When skin cancer develops in people of color, it's often in a late stage when diagnosed. This can be deadly when the person has melanoma, a type of skin cancer that can spread quickly. The good news is you can find skin cancer early.
